DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The prior art discloses a hybrid vehicle power generation system having a motor, dc bus, converter, an AC/DC converter, energy storage device and a controller. However, the prior art fails to show, in combination with the invention, a first power converter connected to a turbogenerator/motor and the DC bus and the first power converter serving as an AC/DC converter when the power is supplied from the turbogenerator/motor to the DC bus and a DC/AC converter when the power is supplied from the DC bus to the turbogenerator/motor during start up and operation of the turbogenerator/motor. Also, the prior art fails to show a second power converter connecting a hybrid vehicle energy storage device to the DC bus and transferring power between the DC bus and the storage device and both power converter functioning as power controller to provide a distributed power system to regulate the DC bus to a desired voltage independent of turbogenerator/motor speed and having means for detecting transients associated with any permanent magnet turbogenerator/motor and the storage device and having a resistive load connected across the DC bus to dissipate power from the DC bus whenever the DC bus exceeds the desired voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is (703) 305-1563. The examiner can normally be reached on M-F (8AM-5PM).
